

CLEARLUX25™ – VIBRANT COLOR, LONGER LASTING

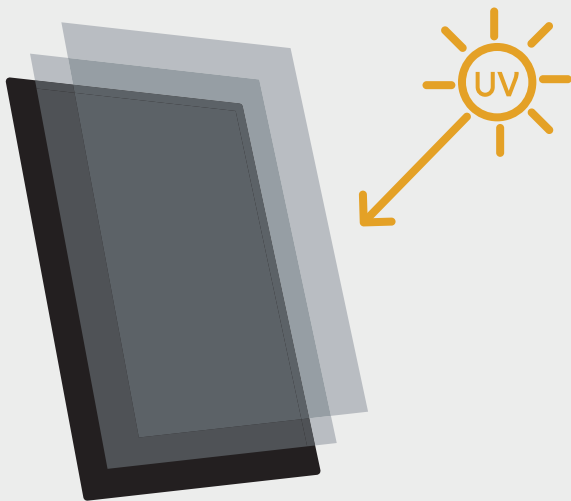

This is how Lepage brings proven automotive technology to the world of windows and doors.

ClearLux25™ consists of two transparent protective layers applied over the aluminum color finish.

Invisible to the eye and offered in the same sheen as standard paint, they are designed to protect pigments, helping to reduce fading and loss of brilliance, year after year.

WHY CLEARLUX25™?

Durable, proven protection

- › High performance transparent protection inspired by automotive processes.
- › Up to **45% improvement in UV protection**, depending on color.
- › Protection against:
 - UV rays
 - Oxidation
 - Atmospheric contaminants

A finish that remains rich and luminous

- › Long-lasting color protection
- › Preserves the original architectural intent

A warranty that makes a difference

- › 25-year warranty against fading

Important: Fading is a natural phenomenon that affects pigments exposed to sunlight. ClearLux25™ technology is designed to slow down this process over time.
