FRENCH DOOR

ENTRY DOOR AND MORE

Solid wood, exact proportions, clean sightlines. It works as a front entry that reads from the street, between rooms, or wherever a door needs to do more than close. Over 40 models to choose from, fully customizable. Add our combo screen door and you have a cross-breeze without the compromise. Also available as a Dutch door. A true classic that earns its place in any setting.

KEY FEATURES

> Variety of frame depths for deeper walls

> Multipoint or mortise hardware lock system

> Available in multiple panel configurations

> Available with triple glass and 2 1/4" panels for increased thermal performance

> Wood storm and screen combination

> Stiles and rails with different sizes

> Raised or flat panel options

> Impact Series available

> Insulated panel options

> Reinforced stiles for 2 1/4" panels

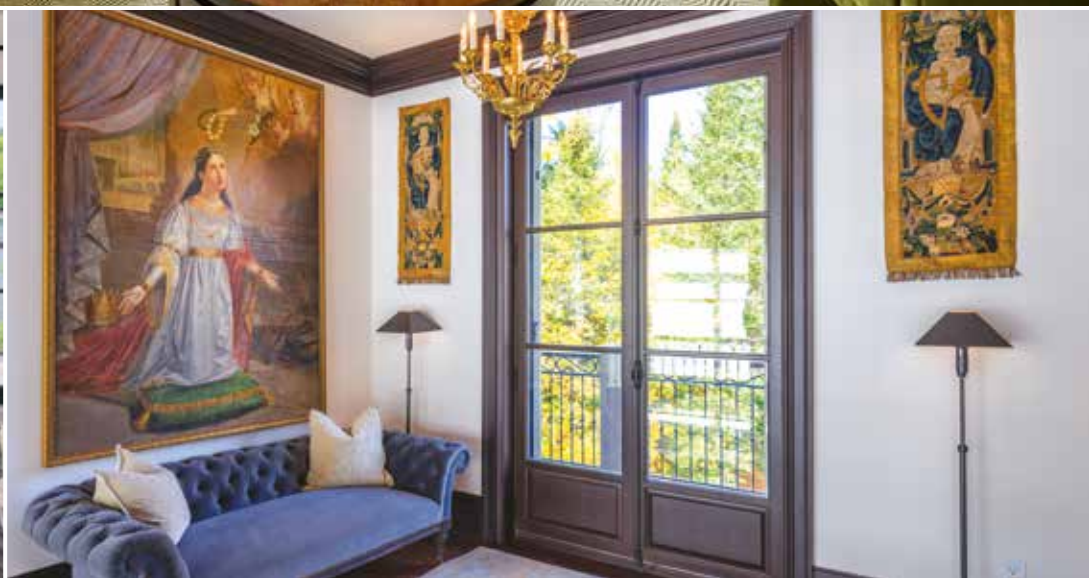

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

BALCONY DOOR

FULL HEIGHT. FULL CHARACTER

Same DNA as the In-Swing French Casement — inward swing, slim solid wood frame, cremone bolt hardware. Where the casement stops at the sill, this one goes to the floor. More light, same character, same reliability. A door that's considered as the rest of the room.

KEY FEATURES

> In-swing application to meet design harmony

> Interlocking sashes for a unique look and style

> No fixed post between the sashes for an unobstructed view

> Available with triple glass and 2 1/4" panels for increased thermal performance

> Available with upscale hardware

> Wood screen options

> Raised and flat panel options

> Insulated panel options

> Reinforced stiles for 2 1/4" panels

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

PATIO DOOR

SIMPLE. ENGINEERED TO STAY THAT WAY

Two panels, three, or four — the patio door scales to the opening without complicating it. Smooth operation, straight lines, nothing unnecessary. It fits a modest back door as naturally as a full-width garden opening. The product you stop thinking about after day one.

KEY FEATURES

> High-quality ball bearing system for a smooth sliding operation

> Many different configurations available

> Multi-point lock to ensure performance and security

> Available with triple glass and 2 1/4" panels for increased thermal performance

> Sturdy aluminum screen

> Stiles and rails with different sizes

> Raised or flat panel options

> Insulated panel options

> Reinforced stiles for 2 1/4" panels

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

LIFT & SLIDE DOORS

WIDE OPENINGS. ONE EASY MOTION

Built for moving panels that other doors can't cover. Turn the handle down and the panel rises off its weather-stripping — then glides with almost no effort, no matter the size. When closed, it sits back down and seals tight. Up to 6 panels, maximum glass, maximum view — quiet operation that makes a big door feel effortless.

KEY FEATURES

> Operating panels that glide effortlessly

> Ideal for very large panels

> Many different configurations available up to 30 ft wide

> Multi-point lock to ensure performance and security

> Available with triple glass and 2 1/4" panels for increased thermal performance

> Wood screen options

> Stiles and rails with different sizes options

> Insulated panel options

> Reinforced stiles for 2 1/4" panels

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

BI-FOLD DOOR

OPEN THE WHOLE WALL

The Folding Door turns most of a wall into an opening — panels fold and stack to one side, the other, or both. Need to step in and out without moving everything? One panel operates independently. The sill rises to seal tight when closed. Add a folding screen across the full span, and the opening ventilates without the bugs. The wall stays while the possibilities expand.

KEY FEATURES

> Many different configurations available

> Heavy-duty hardware

> Locking options for a secure and smooth operation

> Available with triple glass and 2 1/4" panels for increased thermal performance

> Pleated screen options available

> Stiles and rails with different sizes

> Out-swing application

> Insulated panel options

> Reinforced stiles for 2 1/4" panels

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

MULTISLIDE DOOR

INSIDE AND OUTSIDE BECOME ONE SPACE

The Multislide is built to transform walls into horizons. Panels stack to one side, pocket into the wall, or split and disappear in both directions — the opening is yours to decide. The sill sits flush with the floor, for a smooth transition between inside and out. It can also integrate directly into the flooring for a seamless finish. Big spans, unobstructed view. When it's open, you stop noticing where the door was.

KEY FEATURES

> Maximum height: 10 ft / Maximum width: 30 ft

> Maximum panel size: 45 sq. ft. for an operating panel / 55 sq. ft. for a fixed panel

> Available with triple glass and 2.25" panels for increased thermal performance

> Solid wood frame and interlock

> Multiple drainage options

> Sleek fiberglass sill

> Optional recessed sill

> Reinforced stiles for 2.25" panels

AVAILABLE WITH ALUMINUM CLADDING

GLASS

DESIGNED TO EMBRACE NATURAL LIGHT

At Lepage, every insulating glass unit reflects proven craftsmanship and cutting-edge technology. Our fully integrated approach, combining artisanal expertise with advanced automation, meets some of the industry's highest quality standards. From real-time optical scanning to the production of oversized, tempered, and laminated glass, every step is executed with uncompromising precision to deliver results worthy of the most ambitious architectural projects.

ACOUSTIC SERIES

In the world of luxury windows, STC and OITC ratings are precision tools for achieving exceptional acoustic comfort. They allow each project to be tailored to its surrounding environment and specific sound conditions, without ever compromising the elegance of the design or the excellence of artisan craftsmanship.

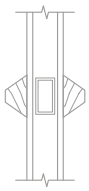

IMPACT SERIES

Engineered to withstand the harshest weather conditions, our Impact Series, featuring highly durable laminated glass, is one of the highest-performing options on the market. It embodies the finest in wood craftsmanship and engineering excellence. Also available with aluminum cladding, it provides sophisticated protection for your home and the people within, without compromising on beauty or performance.

GRILLES

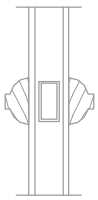

LINES. LIGHT. BALANCE.

By dividing the glass surface into vertical or horizontal sections, grilles add a distinctive architectural character. Available in aluminum or wood for the exterior, and wood only for the interior, they offer design flexibility while enhancing the individuality of each project, whether classic or contemporary, with refined elegance.

PUTTY GLAZE SIMULATED DIVIDED LITES

Our contemporary SDLs blend seamlessly with both modern architecture and historically inspired designs. Also available in aluminum.

COLONIAL SIMULATED DIVIDED LITES

Our standard colonial SDL profile is a classic choice available in several widths. Also available in aluminum.

FLAT SIMULATED DIVIDED LITES

Our standard flat SDL profile is available in several widths to match any modern style. Also available in aluminum.

DAVIS AND HUDSON SIMULATED DIVIDED LITES

Featuring a deeper profile, our Davis (7/8") and Hudson (5/8") SDLs have become our customers' most popular choice. For 2-1/4" sashes only.

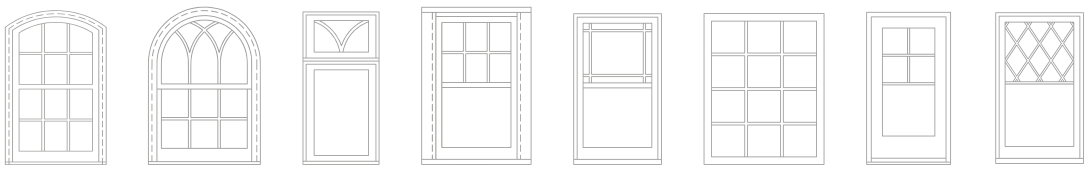

MONOMOY

Our Monomoy profile features a refined, architecturally inspired wood profile that delivers a clean, sophisticated aesthetic. Designed for interior applications on 1 3/4" thick sashes.

TRUE DIVIDED LITES

Our TDL profile, a luxurious and historically accurate option, is a popular choice for renovation and restoration projects.

GRILLES PATTERNS

MOLDINGS

Whether decorative or functional, moldings represent a level of craftsmanship that sets the ordinary apart from the exceptional. At Lepage, they are crafted with industrial precision and the enduring artistry of true craftsmanship.

SCREENS

Carefully crafted using traditional methods, piece by piece, our solid wood screen frames are assembled with premium-quality wooden dowels, ensuring unmatched precision and durability.

ALUMINUM SCREEN

Our aluminum-frame screen is the most versatile option, suited to virtually any application. Compatible with all Lepage products, it is available in a wide range of colors.

WOOD SCREEN

Seamlessly complementing your wood windows, Lepage's wood-frame screen is the ideal choice for your home. It is available in pine, mahogany, eucalyptus grandis™, as well as other wood species upon request.

SCREEN MESH

Invisible mesh for screens offers an unobstructed view, while aluminum (black or gray) or bright copper screen mesh options offer a classic look and durability. A no-see-um mesh option is also available for enhanced protection against even the smallest insects.

WOOD STORM & SCREEN COMBINATION

An optional wood storm and screen combination is available, offering premium style, additional energy efficiency and effortless removal and installation.

RESPONSIBLE MANAGEMENT

FSC® Certification

A responsible, verified, and certified sourcing approach

The Forest Stewardship Council® (FSC®) promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

FSC Chain of Custody certification means that Lepage Millwork's forest supply chain is unbroken for our FSC– certified products and supports responsible forestry.

All the forest-based materials used in our FSC-certified products come from FSC-certified forests or from recycled and/or controlled sources. By choosing FSC-certified Lepage Millwork products, you demonstrate your commitment to forests and those that depend on them.

SUSTAINABLE DEVELOPMENT

Driven by purpose, every step of the way

At Lepage Millwork, our environmental commitment is present at every stage of manufacturing. We optimize the use of wood through efficient processes and continuous investments, reducing waste while honoring the full value of each material.

As part of a circular approach, all wood residuals are recovered and converted into biomass, generating the energy required for our facilities. This practice helps reduce reliance on fossil fuels while improving energy efficiency. We also prioritize responsible practices, including recycling, optimized transportation, and local sourcing whenever possible.

Guided by our craftsmanship, we design durable, high-quality products built to stand the test of time while respecting the environment.
