CASEMENT & AWNING

STYLE WITHOUT COMPROMISE

A family of hinged windows built around two things: versatility and performance. Extensive configurations to fit any opening, any style. Most of our customers start here and most stop here too.

CASEMENT

AWNING

CASEMENT

MADE TO FIT THE ROOM

Multipoint locking and crank hardware supports opening and closing with one hand, no effort. Our structural mullion keeps it deliberately slim, so what you see through the glass isn't interrupted by what holds it in place. A go-to window for a reason.

KEY FEATURES

> Frame and sash made of non-jointed solid wood

> Single structural mull post for a maximum of natural light

> Solid multipoint lock system

> Available with triple glass and 2 1/4" sash for increased thermal performance

> Wood screen options

> Retractable screen options

> Impact Series available

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

PUSH-OUT CASEMENT

TRADITIONAL BY DESIGN. CRAFTED FOR TODAY

It opens by hand, the way windows used to. High-grade hardware keeps the operation smooth and the profile clean on both sides of the frame. It reads as traditional, but works just as well in contemporary settings. Some products age well. This one proves it.

KEY FEATURES

> Frame and sash made of non-jointed solid wood

> Elegant style with a modern construction

> Quality hardware and lock mechanisms

> Sash stay for a premium look and added resistance

> Available with triple glass and 2 1/4" sash for increased thermal performance

> Wood screen

> Impact Series available

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

AWNING

FRESH AIR, RAIN OR SHINE

Hinged at the top, it stays open in the rain without letting water in. Closed, it seals tight. It pairs naturally with fixed or casement units to build larger configurations, and it works anywhere continuous ventilation matters: kitchens, bathrooms, stairwells. Practical by design, and quietly versatile.

KEY FEATURES

- Frame and sash made of non-jointed solid wood
- Solid multipoint lock system for sash closure
- Available with triple glass and 2 1/4" sash for increased thermal performance
- Wood screen options
- Impact Series available
- Motorized operator available

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

PUSH-OUT AWNING

HARDWARE FIRST

Same top-hinged, outward-opening function as the standard awning, without the crank. It pushes open, stays put, and closes clean. What sets it apart is the hardware: high-grade handles and finishes that hold up as well as they look. The kind of detail you notice every time you open the window.

KEY FEATURES

- Frame and sash made of non-jointed solid wood
- Elegant style with a modern construction
- Quality hardware and lock mechanisms
- Sash stay for a premium look and added resistance
- Available with triple glass and 2 1/4" sash for increased thermal performance
- Wood screen
- Impact Series available

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

IN-SWING FRENCH CASEMENT

A REFINED CLASSIC

With both sashes open, there's no center post between you and the view — just the opening, the light, and whatever is outside. It's the kind of window that changes the feeling of a room. Built for heritage homes and new-classical builds, but chosen by anyone who understands that the right window doesn't just perform — it belongs.

KEY FEATURES

> Frame and sash made of non-jointed solid wood

> Distinctive historic design and panoramic views

> Interlocking sashes that open simultaneously

> No fixed post between the sashes for an unobstructed view

> Premium antique-style hardware options

> Wood screen options

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

HARDWARE

CASEMENT & AWNING

The handle you touch every day. The lock that closes with a single motion. The hinge that keeps the sash true after twenty years. We choose hardware for how it performs over time, not just how it looks on day one. Available in a full range of finishes to match the window and the room it's in.

HUNG

A TRADITION THAT WORKS

One of the most demanded window formats in North American architecture — and not just in traditional homes. The hung shows up in contemporary builds, loft conversions, high-design projects. It fits everywhere. Ventilates from the top, the bottom, or both. Mechanics stay hidden. Some windows come and go. This one stays.

HUNG

H-100 HUNG

CLEAN HONEST SIMPLICITY

Traditional proportions, smooth-sliding sashes that tilt in for easy cleaning, discreet hardware that stays out of the way. It does everything a hung window should, without overcomplicating it. Everything it needs to be. Nothing it doesn't.

KEY FEATURES

> Sash made of non-jointed solid wood

> Discreet jamb liners and hardware

> Top-quality weatherstripping to minimize friction

> Concealed tilt hardware that allows the sash to be tipped inward for easy cleaning

> XL and weight and chain models available with triple glass

> Wood and roll-down screen options

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

XL HUNG

FLAGSHIP PRODUCT

Every window in the Hung family is built to perform. The XL Hung just happens to be the one everyone keeps coming back to. It scales to large openings without losing anything — and fits just as naturally in a smaller setting where the proportions simply feel right. You build it exactly the way the project calls for it. The performance is a given. The rest is yours to decide.

KEY FEATURES

- Frame and sash made of non-jointed solid wood
- Perfect for large-size openings
- All-wood interior jamb
- Proprietary "Lite Lift" concealed balance system
- Available with triple glass and 2 1/4" sash for increased thermal performance
- Wood and roll-down screen options
- Impact Series available

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

WEIGHT & CHAIN HUNG

THE REAL THING

The Weight & Chain Hung uses the same counterweight system that defined residential architecture over a century ago — solid brass chain, cast iron weights, the quiet mechanical balance that no modern track can quite reproduce. Built for heritage restorations and period homes, but chosen by people who simply want the real thing. Open one and you'll understand why they built them this way in the first place.

KEY FEATURES

> Frame and sash made of non-jointed solid wood

> Timeless design with modern performance

> Solid brass ball-bearing pulleys

> Available with triple glass and 2 1/4" sash for increased thermal performance

> Wood and roll-down screen options

> Impact Series available

SHAPE & DIRECT SET

LET THE LIGHT IN

No hardware, no mechanism — just glass in a sash and/or a frame. Crafted in wood or aluminum-clad wood and designed to integrate with any window in the collection. When the goal is light, view, or a shape no operable window can achieve, this is where the design starts.

SHAPE

DIRECT SET

ARCHITECTURAL SHAPES

MADE FOR THE DESIGN

Custom-built to the shape the project calls for: circles, half-rounds, ellipses, trapezoids, and compound forms. Solid wood frame, clean sightlines, built around the glass. They work on their own or as part of a larger configuration with casements, awnings, or hungs. The shape is yours. We build it.

KEY FEATURES

> Frame made of non-jointed solid wood

> Unlimited designs

> Matching sight lines when combined with any other windows and doors

> In-sash glazing for a perfect match with other products

> Available with triple glass and 2 1/4" sash for increased thermal performance

> Impact Series available

AVAILABLE WITH ALUMINUM CLADDING

Putty glaze or colonial profile

DIRECT SET

MINIMAL SIGHTLINES

The Direct Set keeps the elevation clean and unified — no interruption. Maximum glass, maximum light, maximum view. The simplest window we make, and often the one that ties the whole project together.

KEY FEATURES

> Frame made of non-jointed solid wood

> Thinner frame lines and high-visibility glass

> Structural assembly with a single mullion to maximize views

> Available with triple glass for increased thermal performance

> Matching sight lines when combined with any other windows and doors

> Impact Series available

> Available with a 90° corner configuration

AVAILABLE WITH ALUMINUM CLADDING

GLASS

DESIGNED TO EMBRACE NATURAL LIGHT

At Lepage, every insulating glass unit reflects proven craftsmanship and cutting-edge technology. Our fully integrated approach, combining artisanal expertise with advanced automation, meets some of the industry's highest quality standards. From real-time optical scanning to the production of oversized, tempered, and laminated glass, every step is executed with uncompromising precision to deliver results worthy of the most ambitious architectural projects.

ACOUSTIC SERIES

In the world of luxury windows, STC and OITC ratings are precision tools for achieving exceptional acoustic comfort. They allow each project to be tailored to its surrounding environment and specific sound conditions, without ever compromising the elegance of the design or the excellence of artisan craftsmanship.

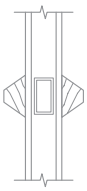

IMPACT SERIES

Engineered to withstand the harshest weather conditions, our Impact Series, featuring highly durable laminated glass, is one of the highest-performing options on the market. It embodies the finest in wood craftsmanship and engineering excellence. Also available with aluminum cladding, it provides sophisticated protection for your home and the people within, without compromising on beauty or performance.

GRILLES

LINES. LIGHT. BALANCE.

By dividing the glass surface into vertical or horizontal sections, grilles add a distinctive architectural character. Available in aluminum or wood for the exterior, and wood only for the interior, they offer design flexibility while enhancing the individuality of each project, whether classic or contemporary, with refined elegance.

PUTTY GLAZE SIMULATED DIVIDED LITES

Our contemporary SDLs blend seamlessly with both modern architecture and historically inspired designs. Also available in aluminum.

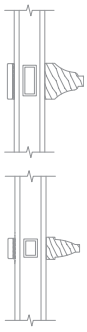

COLONIAL SIMULATED DIVIDED LITES

Our standard colonial SDL profile is a classic choice available in several widths. Also available in aluminum.

FLAT SIMULATED DIVIDED LITES

Our standard flat SDL profile is available in several widths to match any modern style. Also available in aluminum.

DAVIS AND HUDSON SIMULATED DIVIDED LITES

Featuring a deeper profile, our Davis (7/8") and Hudson (5/8") SDLs have become our customers' most popular choice. For 2-1/4" sashes only.

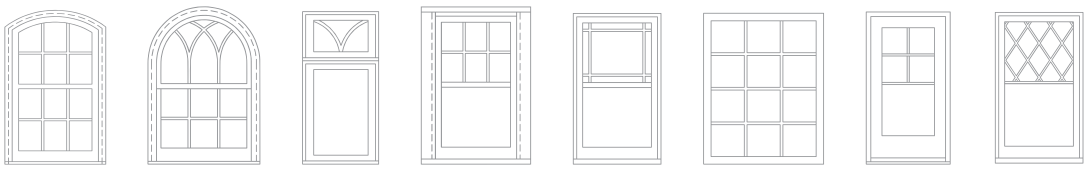

MONOMOY

Our Monomoy profile features a refined, architecturally inspired wood profile that delivers a clean, sophisticated aesthetic. Designed for interior applications on 1 3/4" thick sashes.

TRUE DIVIDED LITES

Our TDL profile, a luxurious and historically accurate option, is a popular choice for renovation and restoration projects.

GRILLES PATTERNS

MOLDINGS

Whether decorative or functional, moldings represent a level of craftsmanship that sets the ordinary apart from the exceptional. At Lepage, they are crafted with industrial precision and the enduring artistry of true craftsmanship.

SCREENS

ALUMINUM SCREENS

This is the most conventional type of screen for all homes and uses. Aluminum-frame screens can be adapted to all products and are available in a wide range of colors.

WOOD SCREENS

Blending perfectly with your wood windows, wood-frame screens are an exceptional choice for your home. Lepage wood screens are available in pine, mahogany, eucalyptus grandis™ or other optional species.

ROLL-DOWN SCREENS

Enjoy an unobstructed view with the convenient option of rolldown screens. Easy to roll down, simply press the bottom corners to gently roll back the screen up and out of sight.

WOOD STORM COMBO

Our combo screens add discreet versatility to your double-hung windows. In summer, they welcome fresh air with ease; in winter, they can be replaced with single-pane glass inserts for enhanced protection. An elegant solution, thoughtfully designed for every season.

Invisible

Aluminum

No-see-um

Copper

SCREEN MESH

Choose an ultra-transparent screen mesh to enjoy an exceptional view. Available in black, gray, or copper aluminum, our premium screen mesh combines elegance with lasting durability. A no-see-um mesh option is also available for enhanced protection against even the smallest insects.

RESPONSIBLE MANAGEMENT

FSC® Certification

A responsible, verified, and certified sourcing approach

The Forest Stewardship Council® (FSC®) promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

FSC Chain of Custody certification means that Lepage Millwork's forest supply chain is unbroken for our FSC-certified products and supports responsible forestry.

All the forest-based materials used in our FSC-certified products come from FSC-certified forests or from recycled and/or controlled sources. By choosing FSC-certified Lepage Millwork products, you demonstrate your commitment to forests and those that depend on them.

SUSTAINABLE DEVELOPMENT

Driven by purpose, every step of the way

At Lepage Millwork, our environmental commitment is present at every stage of manufacturing. We optimize the use of wood through efficient processes and continuous investments, reducing waste while honoring the full value of each material.

As part of a circular approach, all wood residuals are recovered and converted into biomass, generating the energy required for our facilities. This practice helps reduce reliance on fossil fuels while improving energy efficiency. We also prioritize responsible practices, including recycling, optimized transportation, and local sourcing whenever possible.

Guided by our craftsmanship, we design durable, high-quality products built to stand the test of time while respecting the environment.
