WELCOME HOME

A home's entrance is the culmination of its architectural voice and the first thing people notice when they arrive. To ensure Lepage doors are created in perfect harmony with any style of residence or type of restoration project, every model can be ordered from an unlimited number of design variations and colours. Each can be crafted with a sash measuring up to 2 1/4-in. thickness to add character to your masterpiece. To meet our meticulous craftsmanship standards and create exceptional products for our customers, we assemble each Lepage door the traditional way, piece by piece, using solid wood jointed securely with hardwood dowels.

The result is one of unmatched precision, strength, and durability.

CLASSIC

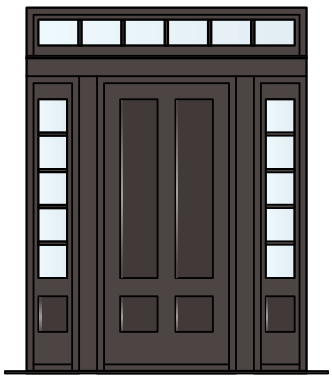

AN ELEGANT WELCOME

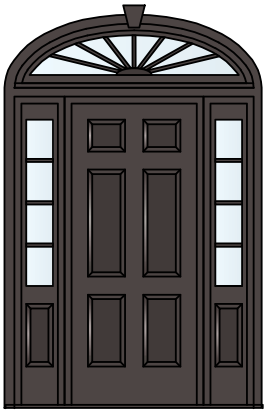

Classic home decor is inspired by timeless style and an effortless combination of sophistication and comfort. Lepage Millwork's classic-style entry doors add warmth and charm to a home's front entrance. To perfect the look of your home with an elegant finishing touch, choose from our wide selection of high-quality finishes and various styles of raised and flat panels.

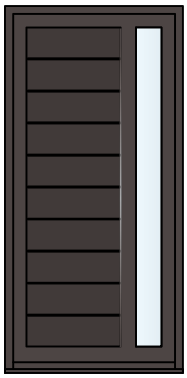

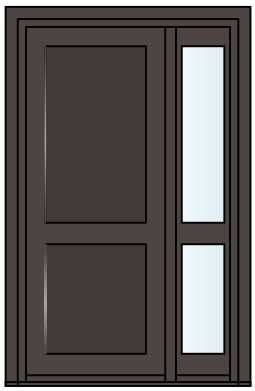

CONTEMPORARY

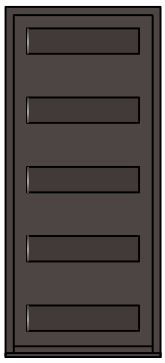

A BOLD STATEMENT

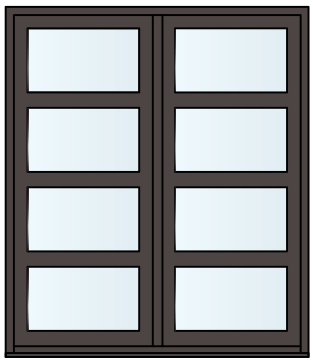

Contemporary styles capture current trends and typically feature bold colours, clean lines and natural elements. Lepage's contemporary style entry doors incorporate very narrow stiles, and rails that allow for larger glass surfaces and surprisingly large door dimensions. Lepage's contemporary style handles are available in both our Standard and Prestige hardware collections.

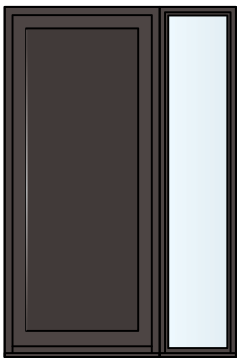

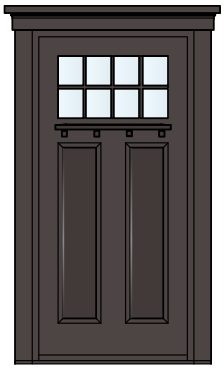

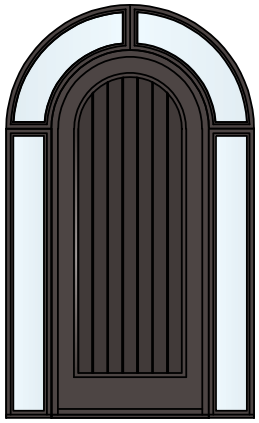

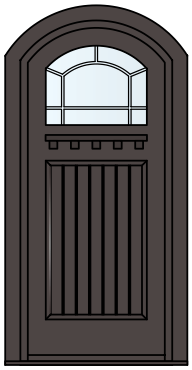

VACATION HOME AND COTTAGE

A FAVOURITE ESCAPE

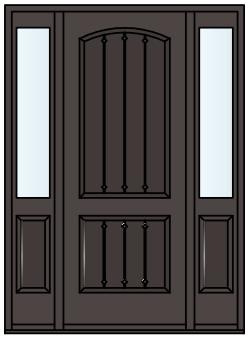

When you think of your dream vacation home or cottage, you likely envision a place where your family gathers together year after year. The architectural style of these homes' windows and doors is typically influenced by the surroundings: large windows and doors with expansive glass for coastal residences. Or more rustic elements and traditional touches for mountain cabins. Lepage Millwork's vacation home and cottage style entry doors add the perfect finishing touch to your favourite place to rest and relax.

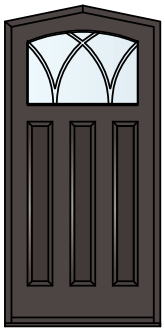

URBAN

BEAUTIFUL AND ROCK SOLID

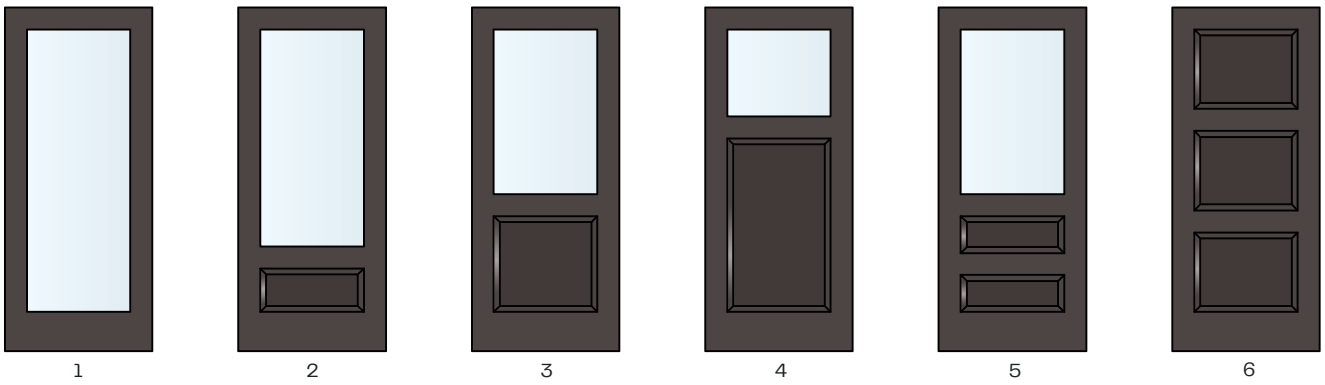

Unique to an urban style, it can be soft and comfortable or bring the city's gritty vibe and industrial feel. Urban homes are designed for living, but architects often experiment with unusual materials and features throughout. Lepage Millwork's urban style entry doors represent an exceptional choice for urban dwellers who demand safety without compromising style.

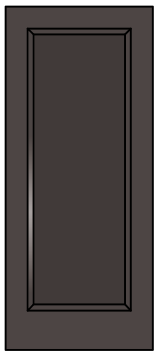

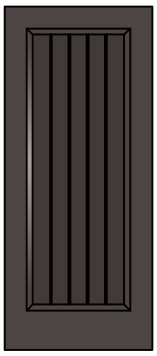

OTHER MODELS

GIVE FREE REIN TO YOUR IMAGINATION

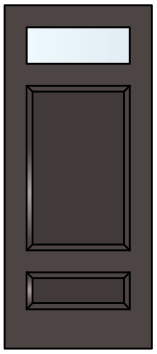

Over the years, our artisans have built thousands of custom doors for homeowners and architects. Choose from a wide variety of standard designs or talk with us about your vision for your home and our artisans will create the custom entry door of your dreams.

CRAFTSMANSHIP

—

Each product is built by our experienced craftspeople with the same meticulous attention to detail.

SHAPES

—

Lepage specializes in expertly crafting custom designs and shapes, including aluminum-clad profiles and curved SDLs.

PANELS

—

Perfectly milled and finished V-groove, flat, raised, diamond, and French wood panels add personality, profile or depth to any door.

ALUMINUM

—

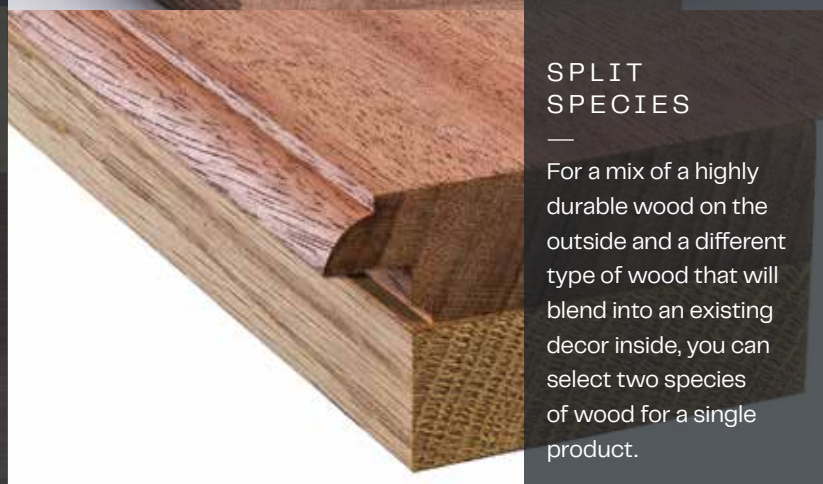

Heavy-duty aluminum extrusion is standard on all wood-cladded Lepage products to ensure years of carefree maintenance and durability.

SPECIES

—

Years of manufacturing wood products have confirmed our trust in pine, mahogany, and eucalyptus grandis to produce beautiful and lasting results. Many other high-quality choices are available.

SPLIT SPECIES

—

For a mix of a highly durable wood on the outside and a different type of wood that will blend into an existing decor inside, you can select two species of wood for a single product.

CONTEMPORARY PROFILE

—

Straight, minimal profiles are available in both aluminum-cladded or all-wood stiles and rails to create a spectacular contemporary style that complements modern designs.

COLONIAL PROFILE

—

Rounder profiles are available in both aluminium or all-wood stiles and rails to reflect the historical design elements of traditional-style homes.

FINISHES

—

Factory-applied finishes ensure top quality, highly durable coatings on all critical surfaces prior to installing the hardware and assembling the final product.

CREATIVITY

—

For any new project or renovation, we combine the experience and talent of our craftspeople in imaginative ways to create new and innovative products.

COMPLEX CONFIGURA-TIONS

—

Custom constructions, including popular Dutch doors that let the air and light pass through while small children and pets remain safely inside.

SHELVES

—

Add-ons and door decorations—including shelves, metal panels, decorative bolts, and special inserts—are only limited by your imagination.

REINFORCED STILES AND INSULATED PANELS

—

Reinforced stiles and high-performance insulated panels provide exceptional stability, superior energy effi-ciency, and long-lasting durability.

STILES AND RAILS

—

Personalized stiles and rails are available in narrow contemporary profiles or wider classic designs for both wood and wood-cladded products.

BOLECTION

—

Lepage decorative mouldings are precision-crafted and cut to add depth, profile, or a flawless 3D effect to panels.

CUSTOM DIMENSIONS

—

From a tiny door for the smallest of pets to the largest door you can imagine, our R&D team is always there to ensure our creations and designs will operate optimally for years.

MOLDINGS

Moldings can be used to cover transitions between different surfaces or simply as ornamental features. Lepage specializes in the art of milling moldings and has invested in industry-leading equipment to ensure precision cuts and identical trims. This is absolutely necessary for perfectly consistent moldings on what can sometimes total thousands of linear feet for a single project.

GLASS

Lepage is an industry leader when it comes to high quality insulated glass units and specialty glass production. We use a fully integrated, computer assisted approach to control the entire production process. From real-time optical scanners, capable of detecting the smallest defects, to industry leading equipment that tempers and laminates glass sheets, every step of the glass production process is optimized in our plant.

ENERGY-SAVING LOW-E GLAZING

A Low-E (low emissivity) coating is applied as a microscopically thin film on the surface of the glass to increase the energy performance. Various types of Low-E coatings are available with all of Lepage's glass products to cover every climate.

SPECIALTY GLASS

Typically used to bring more privacy to an area of your home or to create a unique design, we offer specialty glass in a host of colours, patterns, textures and opacities to bring a completely new dimension or peace of mind to any room.

Acid Etched | Tinted Bronze | Tinted Grey

ARGON GAS INSULATED GLASS UNITS

Argon is a naturally occurring, non-toxic gas that is used to increase the energy efficiency of insulated glass units. Argon also helps to create a low-humidity environment for the window and door's components.

DOUBLE GLAZING

All Lepage windows and doors come standard with double-pane glass. The space between both panes is filled with argon gas.

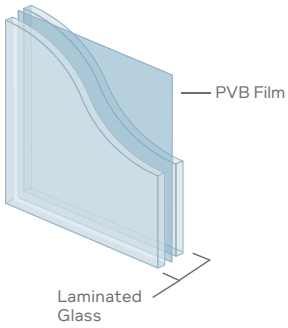

TRIPLE GLAZING

Triple glazing is an available option on our units. It adds a pane of glass and a second gas-filled area in the glass unit, maximizing energy efficiency and providing an even greater level of noise reduction.

LAMINATED SAFETY GLASS

Laminated glass provides added security against major impacts, greatly reduces outside noise and some types can be approved for hurricane-prone areas. A polyvinyl butyral (PVB) film is laminated between the panes, which allows this safety glass to hold together when shattered.

TEMPERED SAFETY GLASS

Five times stronger than normal glass, tempered glass shatters into thousands of small, relatively harmless pebbles to reduce the risk of injury. A tempering process hardens the glass by heating it until it becomes soft and then quickly cooling it.

Standard Glass | Tempered Glass

SCREENS

AUTHENTIC PRODUCTS

Built the traditional way, piece by piece using solid wood, our screen frames are assembled with high quality hardwood dowels for unmatched precision.

REMOVABLE WOOD SCREENS

Lepage wood screens easily pop out and snap back into place without the need for tabs or push buttons.

Invisible

Aluminum

Copper

SCREEN MESHES

Invisible mesh for screens offers an unobstructed view, while aluminum or bright copper screen mesh options offer a classic look.

WOOD STORM & SCREEN COMBINATION

Made of solid wood, our interchangeable and easy-to-install 1 3/4-in. thick combo doors are a robust addition to any main door. Combo doors allow you to enjoy the cool summer breeze or provide greater warmth in the winter. Simply replace the screens with a single pane during colder months for added protection against the elements.

RESPONSIBLE MANAGEMENT

FSC® Certification

A responsible, verified, and certified sourcing approach

The Forest Stewardship Council® (FSC®) promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

FSC Chain of Custody certification means that Lepage Millwork's forest supply chain is unbroken for our FSC- certified products and supports responsible forestry.

All the forest-based materials used in our FSC-certified products come from FSC-certified forests or from recycled and/or controlled sources. By choosing FSC-certified Lepage Millwork products, you demonstrate your commitment to forests and those that depend on them.

SUSTAINABLE DEVELOPMENT

Driven by purpose, every step of the way

At Lepage Millwork, our environmental commitment is present at every stage of manufacturing. We optimize the use of wood through efficient processes and continuous investments, reducing waste while honoring the full value of each material.

As part of a circular approach, all wood residuals are recovered and converted into biomass, generating the energy required for our facilities. This practice helps reduce reliance on fossil fuels while improving energy efficiency. We also prioritize responsible practices, including recycling, optimized transportation, and local sourcing whenever possible.

Guided by our craftsmanship, we design durable, high-quality products built to stand the test of time while respecting the environment.
